# Project kNFT Winesis

Winesis is a digital collection of 1,000 NFT on ethereum blockchain and 1,000 real wine bottles.

The **Italian Winesis** project provides the most **cutting edge NFTs business** available in the world today for **Professional Collectors, Investors and even betting lovers**. We imagine a **new way** of making business in which **NFTs and physical products live together**.

We have **developed a new way** of giving **value** to NFT and physical objects, not by pricing them by personal opinion (as usually happens) but through **structured smart contracts locked for 5 years**. Each bottle and NFT will have their own locked smart contract whose **liquidity will grow every time an NFT trade takes place**. You will have a dynamic NFT and a **real bottle of wine** which, starting from a minimum declared price, **will increase their value forever in proportion to their rarity**.

# QR Code on the top of the Winesis bottle

Each bottle will have its QR Code which connects the NFT to the physical product. Through that, it will be possible to change the owner of the physical bottle of wine in case a physical sale happens or interact with the smart contract through the Winesis portal.

You will receive, the first NFT artwork that you can hold in your hands.

Imagine having a bottle of wine and a NFT that increase their values every day knowing exactly their potential. The bottle itself is a piece of art.

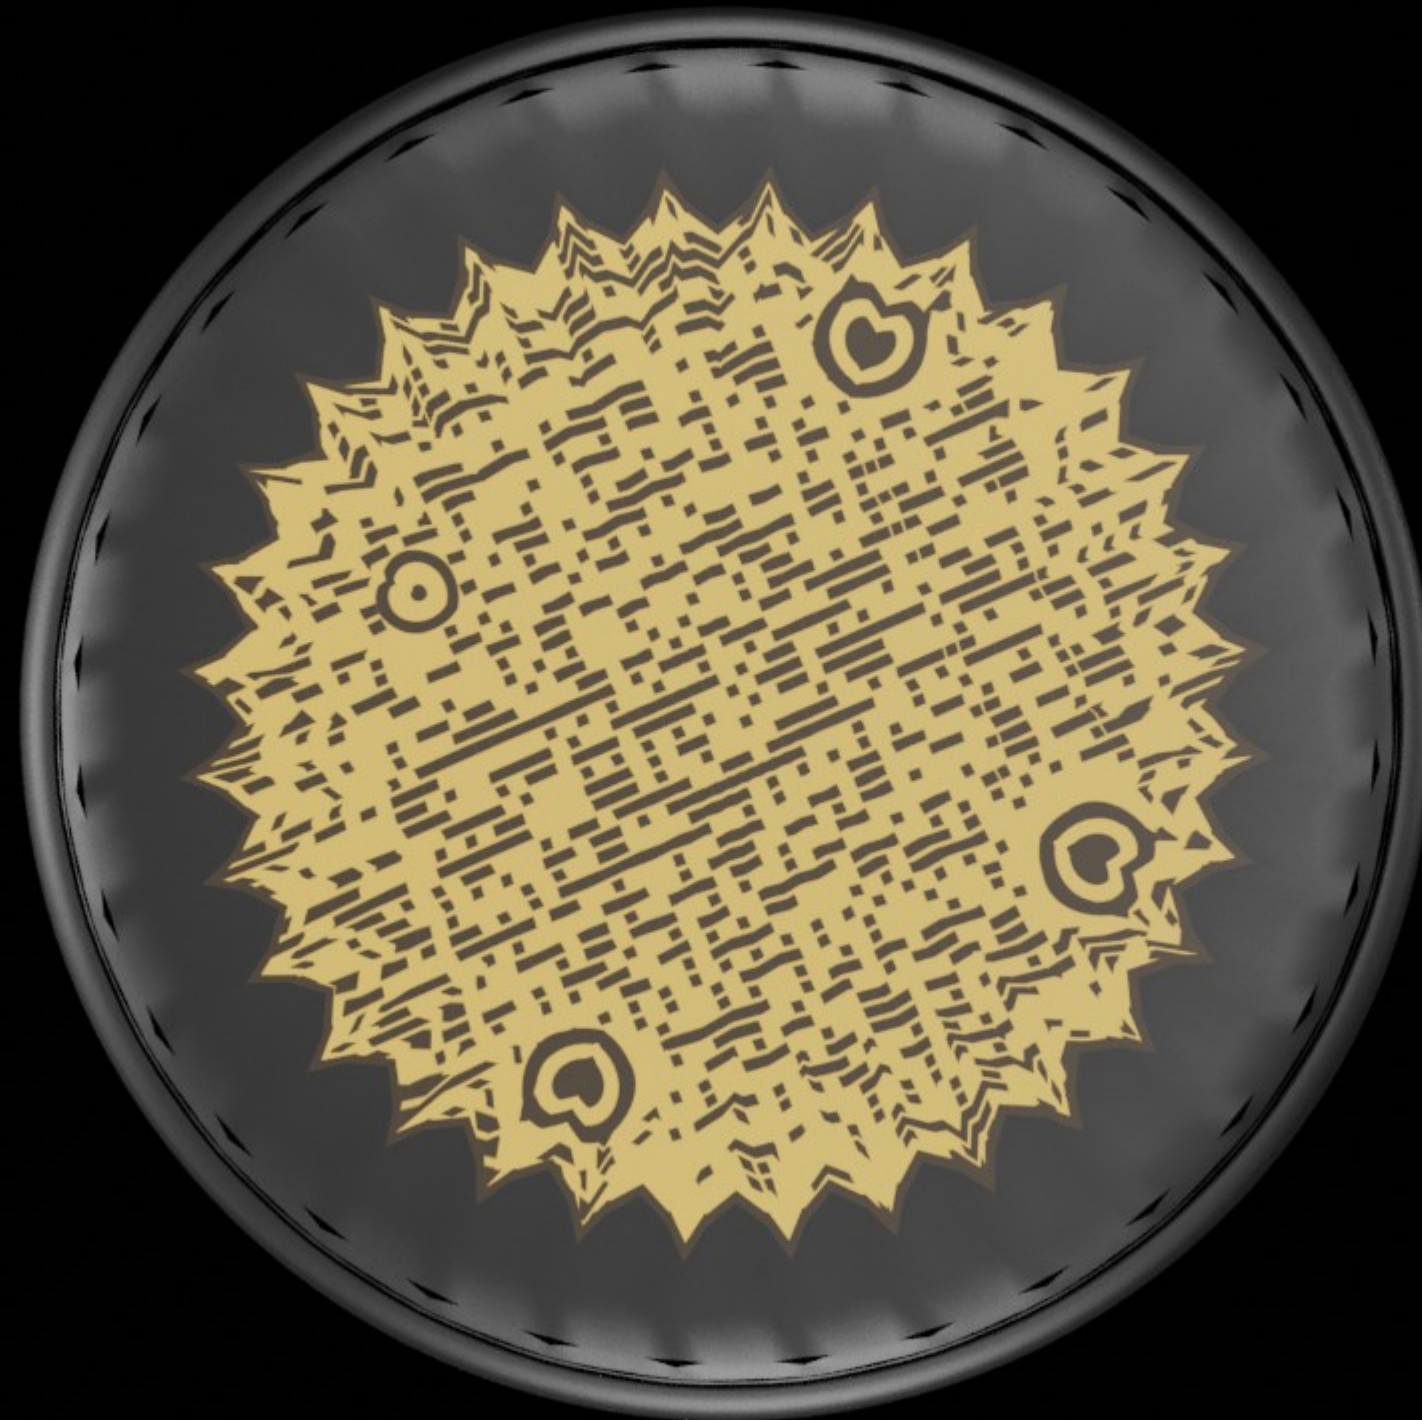

You are free to open the bottle of wine when you receive it, to hodl it as an investment or to resell it at the minimum value fixed in its smart contract.

The Floor Prices of NFT and bottle will never go down for 5 years. Never.  
After that, you can unlock the liquidity.

# How usually is Valued a NFT Project?

OpenSea is the largest marketplace for NFTs, and at the time of this writing, they have over 4 million assets for sale, and this number continues to grow exponentially every day.

The value will certainly decrease with every new piece of artwork or project that launches in the NFT space. An overwhelming number of art and artists will lead to further confusion on what will or should hold value. **Not with Winesis.**

//06

To understand if NFTs will hold future value, you must first look at the following

## RARITY

Is the project highly desirable or limited supply?

## UTILITY

Does the NFT project have use outside of just being a piece of art?

## UNIQUENESS

Is the art/project unique, or does it follow the same 8-bit formula as seen allover?

## MINTING PERIOD

Minting and sale in 15 days, 900 unique kNFT and 100 special edition. We yield 15% splitted in:

**10% in 3 treasury jackpot wallet;**

**5% to help victims of alcohol**

## SELLING PERIOD

Minters can start the sales of NFT. There will be 13% of fee splitted in:

**3% to marketing;**

**3.5% as liquidity for NFT;**

**3.5% as liquidity for real wine bottles;**

**1% in 3 treasury jackpot wallet** (added to liquidities after the draw)

**2% devolved to IARD**

## GOLDEN PERIOD

**Minters will receive the real bottle.** 3 Lucky winners will be drawn to receive a **gold card in bottle** that contains the **private key of the wallet**. The private keys will unlock the 3 treasury described before. **Each minter can potentially win 33.000\$+trading fees per bottle**

## CHARITY PERIOD

**We'll devolve the money to help victims of alcohol** by the **International Alliance for Responsible Drinking (IARD)**, a not-for-profit organization dedicated to reducing harmful drinking and promoting understanding of responsible drinking

# Future implementations in 22/23

We are launching a new form of valuation of NFTs and physical objects.

The first of its kind: the **kNFT**.

We will create a token "**FUSE**" that will allow you to **exchange NFTs or physical products through a dedicated marketplace + app.**

//11

Next generation of kNFTs will arrive on the **metamarket**.

We want to create the first **metamarket** that gives the **possibility** to buy **inextricably linked virtual and physical goods opening your kNFT store.**

# Montepulciano d'Abruzzo Wine | Italy

## DENOMINATION

Montepulciano d'Abruzzo Colline Teramane Controlled Denomination of Origin and Guaranteed Riserva.

## GRAPES

Montepulciano d'Abruzzo 100%

## ALTITUDE

210 m a.s.l.

## SOILS

Medium texture.

## VINEYARD

Row, simple guyot.

## HARVEST

Manual harvest, last ten days of October after grape selection in the vineyard.

## OXYGENATION

Uncorking is recommended 4/5 hours before consumption

### ∞ VIEW

The wine has a succulent red hue and exquisite legs

### ∞ NOSE

Strong oak aromas begins from the moment the cork releases

### ∞ TASTE

Super structured meditation wine, complex in aromas and body. Moderate density and acidity with a slightly dry palate

## VINIFICATION

The grapes deprived of their own stalk are transported inside concrete tanks. The crushed grapes are started for fermentation which is carried out at a controlled temperature with peaks reaching 30°C. Maceration continues for about a month after the end of fermentation, with the daily handling of the mass through manual pumping over. After racking, it is left to "rest" for about 7 months in steel tanks, to then allow the natural evolution of the wine, making it mature in large oak barrels for 24 - 36 months. The refinement in the bottle takes place for about a year.
